

Goff Creek Basin

Lake Washington Watershed

City Basin Population (2000): 1,431

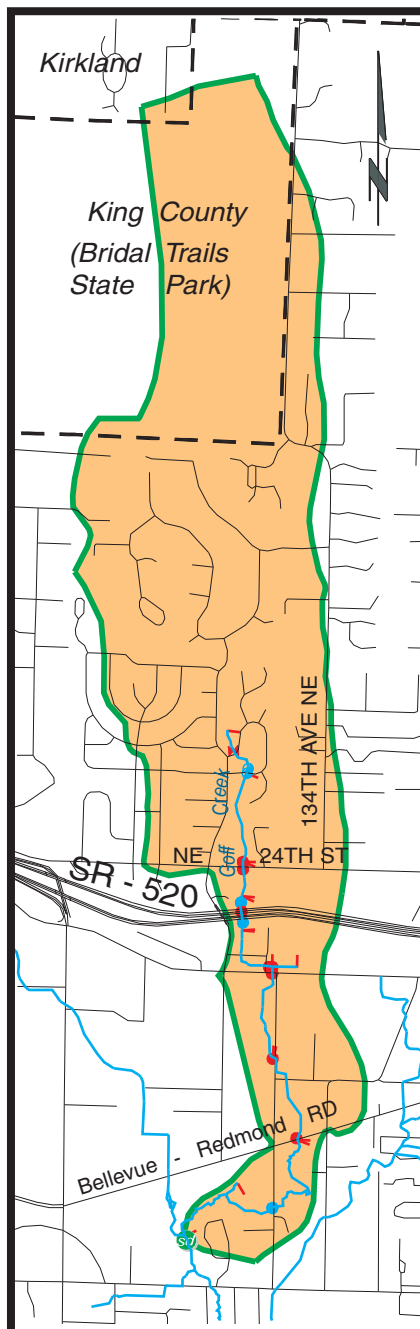

Basin Areas: 679	Total Acres
City	513 Acres
King County	163 Acres
Kirkland	4 Acres

Drainage Jurisdictions: Bellevue, Kirkland
SR-520

% Impervious	30%
Basin Relief	297 ft
Basin Energy	0.3
Basin Length	15,000 ft
Average Basin Width	0.4 mi

Land Use Within the City Area	
Single family residential	62%
Multi-family residential	0%
Commercial/Office	3%
Industrial	3%
Institutional/Government	2%
Open Space/Park	4%
Mixed use/Misc.	6%
Public streets	20%

Total Length of Open Channel 7,028 ft

Fish Use: Goff Creek flows through north-central Bellevue, passing under SR 520 and Northup Way en route to the West Tributary of Kelsey Creek. Heavy commercial and residential development surrounds the creek and contributes surface flow. The significant volume of water in Goff Creek provides abundant opportunities for fish use. Cutthroat trout are known to inhabit the entire length of Goff Creek, and sockeye salmon have been reported in the first downstream segment. Tributary 81-03 does not have sufficient habitat to support fish.
